General Conditions for Sale

PRICE

The Prices set out in this Price Book are exclusive of all applicable taxes, duties, levies, government fees, etc. that may apply and are effective 1st April, 2021. The Prices quoted here are applicable at the time of printing and are subject to alteration without notice. Goods shall be invoiced at Prices ruling as on the date of invoicing plus all applicable taxes and duties.

TAXES AND DUTIES

"Tax" shall include taxes, Good & Service Tax (GST) which shall comprise of Central Goods and Services Tax ('CGST'), the State Goods and Services Tax ('SGST'), Integrated Goods and Services Tax ('IGST') and any other taxes, cess and similar imposts levied under applicable tax related legislations in India as may be applicable. In case the customer is eligible for any exemption or lower rate of tax, the customer is responsible to provide the requisite details, documents, declarations or undertake any prescribed compliances for the purpose of tax exemptions / lower tax rates while issuing purchase order or before supply is made (whichever is earlier). In absence of requisite details, documents, declarations, no tax exemption/ lower rates would be extended. Further, in case of any incorrect / incomplete / non-compliance on behalf of the customer and because of which a demand is made on the Thermo Fisher Scientific India Pvt. Ltd. by the tax authorities, the customer shall be immediately liable to pay the applicable taxes / amounts (including interest, penalty and associated litigation cost) if any upon notification by Thermo Fisher Scientific India Pvt. Ltd.. Customer's Purchase Order should factor all details required for GST computation and credit availment.

DELIVERY

- Delivery conditions are C.I.P. basis for channel partners and door delivery basis for direct customers.
- For order value less than ₹ 10,000 freight will be charged extra.
- While every effort will be made to adhere to delivery dates, no responsibility is and will be accepted for non-delivery or for delayed delivery.
- Items offered are subject to the goods being in stock on the date of receipt of the order.
- Road Permit wherever applicable should accompany the order, failing which the order will not be executed till such time the same is received.
- Sale of certain products is prohibited in some states. Requisite storage license and permit details should be sent along with the order for processing.

INSURANCE

- All goods are packed with utmost care and forwarded at customer's risk.
- No responsibility is taken for breakages or loss in transit. Such claims should be sent to the Customer Services within 24 hours of receipt of goods.

AMENDMENTS OR CANCELLATIONS

An order once placed shall not be cancelled.

All other general terms and conditions of sale of Thermo Fisher Scientific India Pvt. Ltd. apply.

For further details or assistance, please feel free to contact us:

Thermo Fisher Scientific India Pvt. Ltd.

MANAGEMENT SYSTEM CERTIFICATE

Certificate No:
1781-2007-AQ-IND-RvA

Initial certification date:
07, March, 2007

Valid:
15, December, 2018 - 14, December, 2021

This is to certify that the management system of

Thermo Fisher Scientific India Pvt. Ltd.

H.O.: 403-404, B Wing, Delphi Building, Hiranandani Business Park, Powai,
Mumbai – 400 076, Maharashtra, India
and the sites as mentioned in the appendix accompanying this certificate

has been found to conform to the Quality Management System standard:
ISO 9001:2015

This certificate is valid for the following scope:

**Manufacturing and packing of Qualigens brand organic, inorganic fine
chemicals, reagents, test papers and HPLC solvents**

Place and date:
Chennai, 12, September, 2018

The RvA is a signatory to the IAF MLA

For the issuing office:
DNV GL – Business Assurance
ROMA, No. 10, GST Road, Alandur,
Chennai - 600 016, India

Sivadasan Madiyath
Management Representative

Enhanced *Laboratory Portfolio*

Fisherbrand glassware quality ensured with:

- High clarity, uniform thickness and durable glass
- Long lasting graduation marking
- Dedicated QA for calibration and testing
- Superior packaging for safe handling

fisherbrand

Technical Data

Low Expansion Borosilicate Glass

Form the 16th Century to, today, chemical research teams have used glass containers for a very basic reason the glass containers is transparent, almost invisible. And so the contents and the reaction are clearly visible, But because chemists must heat, cool and mix chemical substances, ordinary glass is not always adequate for laboratory works.

Laboratory works requires apparatus made in a glass - which can readily be moulded into any desired shape or from, which offers maximum inertness when in contact with the widest range of chemical substances, which can withstand thermal shock with fracture and high temperature work without deforming, and which will be resilient enough to survive the everyday knocks to which it will be subjected in normal laboratory handling, washing and sterilizing processes.

Chemical Composition

fisherbrand Glassware is a low alkali borosilicate composition. Its typical chemical composition is given under. It is virtually free of magnesia-lime-Zinc group and contains only traces of heavy metals.

Thermal Properties

As the Coefficient of thermal expansion of Borosilicate glass is low, the thermal stresses under a given temperature gradient are consequently low and the glass can withstand higher temperature gradients and also sudden temperature changes/thermal shocks. Minute scratching of glass surface can however reduce its thermal resistance. In general the 'Strain Point' should be regarded as the maximum safe operating temperature of fisherbrand glassware. When heated above 500°C the glass may acquire permanent stresses on cooling. All fisherbrand labware is annealed in modern ovens under strictly controlled conditions to ensure minimal residual stress in the products.

Chemical Durability

fisherbrand Glassware in highly resistance to water, neutral and acid solutions, concentrated acids and their mixtures as well as to chloride, bromine, iodine, and organic matters. Even during extended period of reaction and at temperatures above 100°C, its chemical resistance exceeds that of most metals and other materials. It can withstand repeated dry and wet sterilisation without surface deterioration and subsequent contamination. Resistance to attack of various chemicals is shown under. Only hydrofluoric acid, very hot phosphoric acid and alkaline solutions increasingly attack the glass surface with rising concentration and temperature.

Fabrication with Borosilicate Glass

Due to low expansion of glass and easy workability, this glass can be shaped, formed, joined into complicated apparatus. It can be done even by an analyst in his own laboratory. He can keep on changing till he gets what he needs. In case where annealing in a controlled oven is difficult he can do so by flame annealing which is also great advantage.

Optical Properties

Laboratory glassware made from Borosilicate Glass shows no noticeable absorption in the visible region of the spectrum. It appear consequently clear and colourless.

When treated with proper care fisherbrand laboratory apparatus will give a long and satisfactory service. The following prepared notes are to assist users in obtaining the maximum life and performance from their apparatus. Our sales department will be happy to advise on any aspect concerning the safe use of our products.

PERCENTAGE BY WEIGHT

SiO ₂	81%
B ₂ O ₃	13%
Na ₂ O	4%

Coefficient of Linear Expansion	32.5x10.7°C
Strains Point	515°C

Do & Don'ts for Glassware

- Ensure that the glassware is clean, dry & do not have any scratches or indication of cracks or strains.
- Glassware should not be used for handling hydrofluoric acid. High quality plastic should be used.
- For light sensitive materials, amber colored glassware should be used.
- While swirling, shaking or tapping the flasks with contents in order to mix, care should be taken that glass does not break and cause injuries.
- Flask or bottles should be held from bottom and not from neck as it may break and cause injuries.
- Glassware should not be held above shoulder height to avoid accidents.
- Glassware should not be handled with wet or oily hands.
- Keep the glass bottles, bigger flasks etc., on rubber sheet to avoid breakage.
- Flask or bottles should be held from bottom and not from neck as it may break and cause injuries.
- Suitable carrier should be used to carry glassware of high capacity filled with content.
- Glassware should not be held above shoulder height to avoid accidents.
- Use heat resistant gloves and accessories like pair of tongs (wherever required) to handle hot glassware.
- Glassware should not be handled with wet or oily hands.
- Keep the glass bottles, bigger flasks etc., on rubber sheet to avoid breakage.

Preventing Cuts

- Hand gloves should be worn when washing glassware by hand.
- Glassware cuts are more common than you might expect and can be serious.
- Inserting a glass stem into a rubber stopper can be dangerous without proper precautions.
- The task can be made safer and easier by first lubricating the glass.
- Laboratory grease works well, but even deionized water is better than nothing.
- Protect hands with gloves, rags, or a shield fashioned from wood or plastic.
- When connecting plastic tubing to the side arm of a flask, condenser, etc., grease or wet the tubing (acetone works well on vinyl tubing).
- Then, with some type of hand protection, slowly work the tubing onto the glass nipple.
- When removing tubing from glassware, do not attempt to pull it off.
- First lay the item on the lab bench, if possible.
- Cut the tubing near the end of the glass.
- Next, slice the tubing lengthwise and slide the material off the glass nipple.
- Always cut away from your body.

Pressure / Vacuum

- When glass is used under pressure or vacuum, taking extra precautions is advised.
- Surface scratches are the most common defect causing weakness and breakage.
- Be sure to inspect glassware for small defects before applying pressure or vacuum.

Personal Safety

- Use tongs or asbestos gloves to remove all glassware from heat. Hot glass can cause severe burns.
- Always flush the outside of Acid bottle with water before opening.
- Do not put the stopper on the counter top where someone else may come in contact with acid residue.
- Do not look down into a test tube being heated or containing chemicals.
- Never use Beaker for drinking water. A beaker left specifically for drinking is menace to the laboratory.
- Do not test chemicals for identification by smelling or touching.
- Perchloric acid is especially dangerous because it explodes on contact with organic materials. Do not use perchloric acid around wooden benches or tables.

Footwear

- Finally, open-toed shoes should not allowed in laboratories (not while on feet, that is).
- Toes in open shoes are more vulnerable to cuts from dropped glassware, chemical attack, and a variety of impact injuries

Glass Disposal

- Used and/or broken glassware should be free of chemical and biological hazards prior to disposal.
- Place glass in a puncture-resistant box, label "BROKEN GLASS" and secure with tape.

Class "A" TEST CERTIFICATE

Certificate No. :		Date :	
Test Method :			
Item Tested :			
Catalogue No. :			
Individual Code :			
Item Tested on :			
Nominal Volume :	ml		
Tolerance :	±	ml	

The product was found to contain the following volume at
 Certified Volume : ml

The product has been calibrated with following devices :

Balance :
 Thermometer :

Environment Condition : Temperature RH%

The above product has been examined for compliance to, Class A.
 It has been found to satisfy the specified requirements.
 The above calibration result is valid at the time of calibration under lab condition.
 All the above devices have valid calibration traceable to NPL, India
 This report shall not be reproduced, except in full, unless with written permission

- *Burettes*

Note: COC for "A" class Volumetric ware that have reached our warehouse after 1st August, 2015, will be available on portal. For Volumetric ware received before 1st August, 2015, online portal allows customer to send request for soft copy on their email-id.

Volumetric Glassware

- Precision Bore Tubing
- Amber Graduation
- Individually Calibrated
- Complete Traceability
- ISO & ASTM specifications
- NABL Certified

fisherbrand glassware assures accuracy and precision in volumetric measurements

- **Volumetric Flasks**
Clear, Amber (ISO / ASTM)
- **Pipettes**
Graduated, Volumetric, Mohr (ISO / ASTM)
- **Measuring Cylinders**
Hexagonal, Stoppered (ISO / ASTM)
- **Burettes**
Glass Key, PTFE Key (ISO)

Other Key Products in Glassware Range

- **Bottles**
