**TO WHOMSOEVER IT MAY CONCERN**

Dear Sir/Madam,

**Greetings from Actylis !**

Following our previous notification in 2021 concerning the acquisition of Finar by Aceto and the subsequent rebranding under the new brand name Actylis in September 2022, we are pleased to inform you that gradually all our products will have the Actylis logo on labels and packing material. As this branding update is gradual, you may receive the products in dual branding considering the utilization of existing inventory. Our rebranding efforts also include all organizational documents, including CoAs, MSDS, Specifications and Quality documentation.

Our new logo will be as below:

Previous Company Logo	New Brand Logo
	

We are also pleased to inform that our products under Laboratory Chemical segment will have new "PINK" cap on primary packing material. This will also happen in gradual manner.

While our new global brand will create organizational unity, please note that there will be no legal entity name change, as such there will be no impact to Finar Limited's regulatory licenses. Our rebranding efforts will not incur any changes to the manufacturing or distribution processes, raw material source and specifications, testing requirements, primary packaging components, storage conditions or any other critical processes inherent to product quality.

Regards,

Raj Kumar Gupta

# Globally Harmonised System GHS Pictograms and Hazards

The GHS is an acronym for The Globally Harmonized System of Classification and Labeling of Chemicals. The GHS is a system for standardizing and harmonizing the classification and labeling of chemicals. It is a logical and comprehensive approach to:

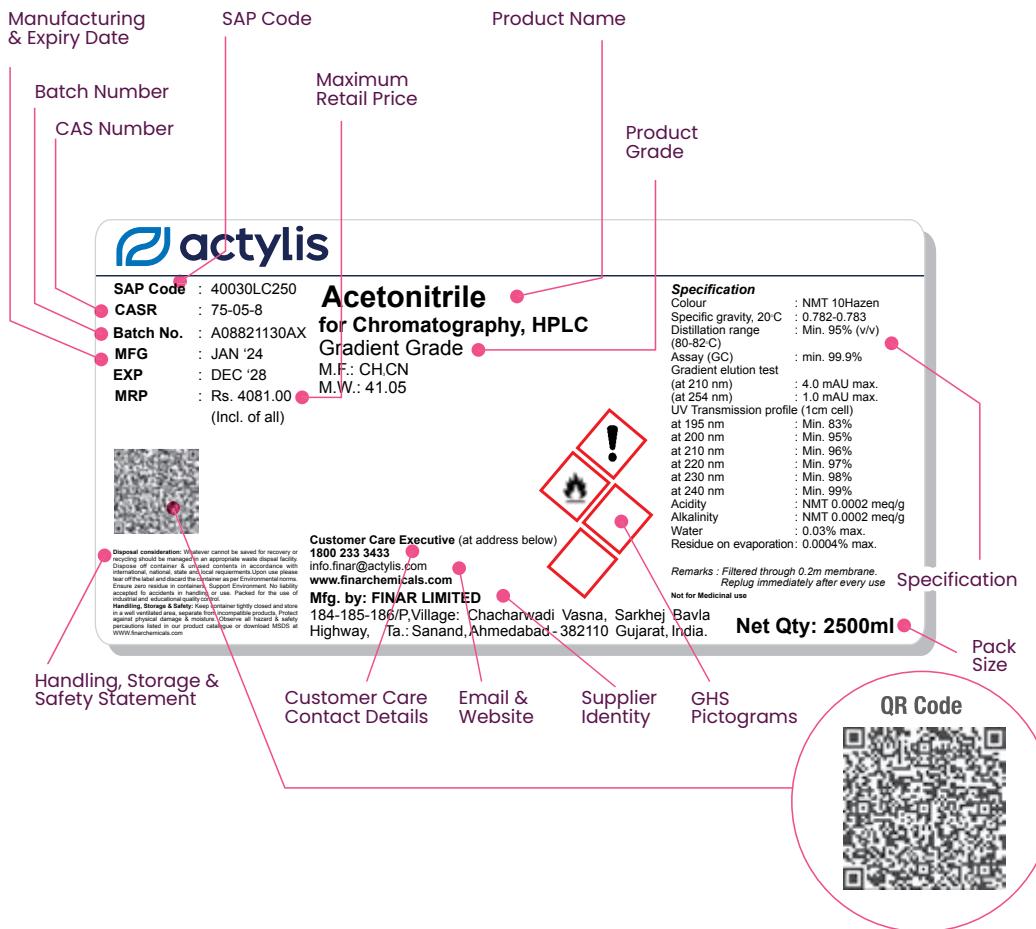

- Defining health, physical and environmental hazards of chemicals
- Creating classification processes that use available data on chemicals for comparison with the defined hazard criteria
- Communicating hazard information, as well as protective measures, on labels and Material Safety Data Sheets (MSDS)

The hazard communication is made through GHS Pictograms depicted below that indicate the potential hazard of the product.

<b>Health Hazard</b>		<b>Flame</b>		<b>Exclamation Mark</b>	
<ul style="list-style-type: none"><li>• Carcinogen</li><li>• Mutagenicity</li><li>• Reproductive Toxicity</li><li>• Respiratory Sensitizer</li><li>• Target Organ Toxicity</li><li>• Aspiration Toxicity</li></ul>	<ul style="list-style-type: none"><li>• Flammables</li><li>• Pyrophorics</li><li>• Self-Heating</li><li>• Emits Flammable Gas</li><li>• Self-Reactives</li><li>• Organic Peroxides</li></ul>	<ul style="list-style-type: none"><li>• Irritant (skin and eye)</li><li>• Skin Sensitizer</li><li>• Acute Toxicity (harmful)</li><li>• Narcotic Effects</li><li>• Respiratory Tract Irritant</li><li>• Hazardous to Ozone Layer (Non Mandatory)</li></ul>

# Label Information

The newly designed labels are visually appealing, offer comprehensive product details, and a special emphasis is on handling, storage and safety information along with the hazard pictograms adhering to GHS Compliance.

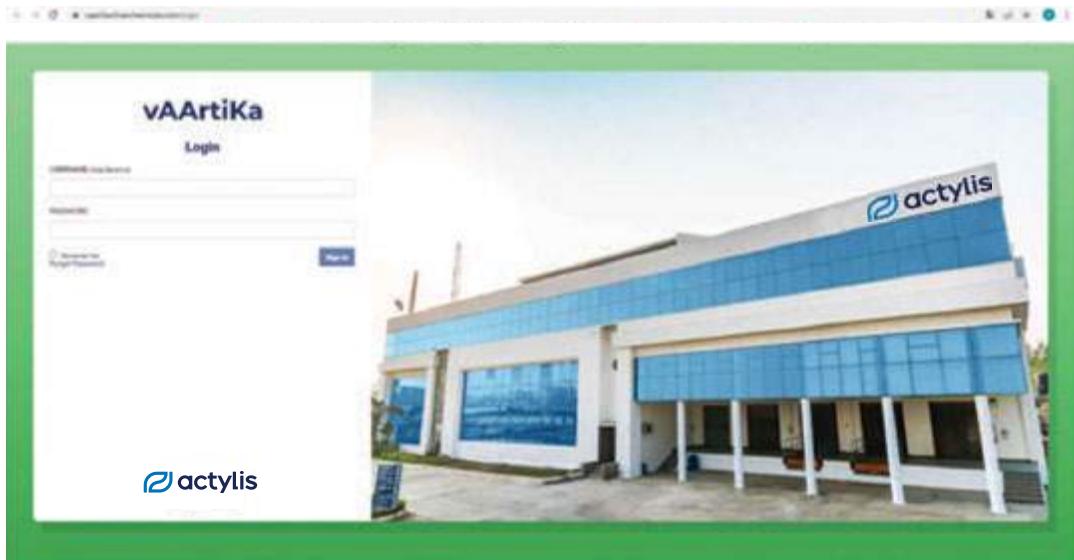

All Product Labels come affixed with a unique QR code. Users can easily scan the QR code through their handheld device such as a smart-phone or a tablet and instantly obtain the Product COA of that particular batch. All you need is a QR code scanner/reader installed in your device which may be downloaded from the Google Play Store for Android devices or Apple Store for IOS devices.

Users are advised to observe the storage, handling & safety instructions mentioned on each label or MSDS and consider them good for use and guaranteed to perform upto the prescribed shelf life of the product.
